APRESENTAÇÃO

O acompanhamento das informações emanadas das instituições ligadas à produção de soja é uma necessidade não só dos pesquisadores e extensionistas mas de todos os que atuam direta ou indiretamente no processo produtivo. No Brasil, tem sido produzida uma considerável quantidade de tipos de publicações, tais como: boletins, circulares, comunicados, informes, e outras publicações não-convencionais, além dos trabalhos técnico-científicos publicados em veículos especializados, nacionais e internacionais. Tal acervo bibliográfico está sendo reunido pelo Setor de Informação e Documentação do Centro Nacional de Pesquisa de Soja.

Esse trabalho seria de pouco valor se tal acervo não fosse acessível a todos os interessados. Por isto, com a finalidade de colocar a informação ao seu alcance, foram reunidas, neste "Catálogo de Publicações Seriadas Sobre Soja Existentes no SID/CNPSo", 530 referências de publicações de caráter científico, acima mencionadas.

Para a obtenção de cópias dos trabalhos, solicitamos aos interessados dirigirem-se ao Setor de Informação e Documentação do Centro Nacional de Pesquisa de Soja.
