Programs and projects currently being implemented in the CDRMF include:

- ▶ Rural Environmental Registry Program (CAR) – facilitating the registration of farms according to current environmental legislation;
- ▶ Use and conservation of araucaria species in family agriculture – conducting research related to forest management and production systems for small-scale farmers;
- ▶ Roads with Araucaria – encouraging the planting of *Araucaria angustifolia* trees along roadways as a means of developing payment for ecosystem services (PES);
- ▶ SOS springs – recovery of riparian zones and sanitation in rural areas;
- ▶ Sustainable Beekeeping – increasing productivity and assisting with certification for producers;
- ▶ Environmental education in the Peixe River Basin – training workshops for elementary and high school teachers;
- ▶ "Pescar" Project – teaching at risk teenagers various subjects such as environmental education, forestry, wood technology, informatics, etc;
- ▶ E-waste – developing electrical and electronic waste collection;
- ▶ Ecological corridors – developing sustainable activities in the ecological corridor of the Timbó River;
- ▶ "Living pharmacy" – planting and processing of medicinal plants and distribution of phytotherapeutic products;
- ▶ Agroecological Fair and Farmers' Market – marketing products from family farms;
- ▶ Forests of high conservation value – identifying habitats specifically for monitoring birds;
- ▶ "Paes" Project – documenting environmental approaches and examples of sustainability to disseminate through print and broadcast media.
