Medeiros, George Ney P.

Guia para elaboração de perfis: incidência de assuntos abrangidos pelo "Biological Abstracts". Brasília, DF, EMBRAPA. Departamento de Informação e Documentação, 1980.

17p. (EMBRAPA/DID/SDI, 5)

1. Perfis de usuários. I. Título. II. Série.

Preparamos este levantamento para servir como subsídio a analistas e usuários do SDI/EMBRAPA, na fase de elaboração de perfis.

A fim de atingirmos nosso objetivo, colocamos ao lado de cada título de assunto o número de referências bibliográficas disponíveis, em um fascículo do BIOLOGICAL ABSTRACTS. Isso habilitará analistas e usuários a decidirem se o BIOLOGICAL ABSTRACTS contém matérias diretamente relacionadas com sua área de interesse, assim como a formarem uma idéia de sua incidência.

Pretendemos, futuramente, adotar o mesmo procedimento com as outras bases de dados utilizadas pelo SDI/EMBRAPA, o que, naturalmente, será de grande valia, tanto para os usuários, como para o sistema.

George Ney P. Medeiros

-Obs.: os dados aqui apresentados foram obtidos através do "CONCEPT INDEX" referente ao fascículo nº 1, vol. 65, 1978, do "BIOLOGICAL ABSTRACTS".
